

Volume II Issue III
April 2006

S.P.I is proud to say that we are entering our 19th month in business. I look back and see that we have come a long way. We have achieved all of the goals that we set since day #1 in operation, which could not have been done without the hard work and dedication of the S.P.I staff. I believe that we are now among the leaders in Central Stations, providing a wide range of services to the alarm professionals.

If you are not an S.P.I dealer yet just try us out; you will see the difference. I would also like to take this opportunity to thank the dealers who passed by our booth in Quebec City and Montreal at the Burtek Road Show last month. For those of you who could not make it, we hope to see you at the CANASA Show on April 27nd, 2006, in Laval, quebec. Stop by our booth (#111) and meet some of our personnel. If you are not a CANASA member, just give me a call and I can set you up with a free pass to the show.

Having worked for over 25 years in the security industry, I have dealt with many Dealers and set the standards by which central stations operate today. When Surveillance Plus became a reality, I took each aspect of the standards even further. Technology is continuously evolving, and our goal is to keep up with the rapid changes, enabling Surveillance Plus to deliver more to its Dealers, both effectively and consistently.

Through hard work and dedication I've earned the rights to the exclusive products outlined in this newsletter. Come visit our operation and don't miss out on this opportunity to become involved and watch the profits of your establishment soar. Even after accomplishing this great task, SPI has quite a few surprises left in store for the Alarm Dealers and the security industry in the months to follow. We hope you will come along on this journey with us.
